

This is how our work moves us toward our vision — opportunity and support for every child in every state.

Where children live, the color of their skin, and the economic stability of their families too often determine their destiny. These disparate outcomes are not accidental; they are rooted in generations of exclusion and unequal access to power, especially for communities of color.

In response, the Alliance creates powerful advocacy communities in all 50 states that advance the policies that ensure each and every young child can thrive.

State Early Childhood Policy Advocates

We Invest.

We resource state policy advocates and technical experts to support them.

We Connect.

We build the peer and network connections and community that increase capacity and accelerate advocacy.

We Catalyze.

We challenge and support policy advocates as they strengthen new mindsets and skillsets.

State Early Childhood Policy Ecosystem

Young children are a policy priority in every state because a bold advocacy voice, representing the unique communities and political context of each state, has political power.

Policymakers

Governors, state legislators, and agency officials prioritize policies and funding that promote the health and early learning of young children and their family economic stability.

Result:

Every child in every state has what they need in the early years to realize their full potential for a lifetime.
